Generous giving sets us free for joyful living.

Taking time to pray about our giving as a faith response is a spiritual practice that deepens our commitment as disciples of Jesus Christ. Numerous verses in the Bible make reference to the tithe (10%) as a benchmark for faithful, proportional giving. We do not all have the same means to give but we do all have the opportunity to give proportionally from our means. Percentage giving helps us think about our generosity in relation to our income. The chart to the right will help you consider your own giving in support of the ministries of Trinity for the coming year. First find the amount in the left-hand column that represents your household income. Then look at examples from the other three columns of what giving at 2%, 5%, and 10% of your income would look like. What percentage, perhaps one of these or something even more, feels like a commitment that demonstrates both trust and sacrifice? Take time to pray. Once you find peace about a decision, commit yourself to it and give thanks to God.
